## Synopsis

An amusing and poignant examination of one man's career as a director/performer of pornography. This cinematic penetration into the adult film industry and France's most prominent skin auteur Hervé P. Gustave, who goes by the moniker HPG, reveals the trials and tribulations with the creation of the ever expanding and increasingly demanding adult industry.

In this tragic story of human debris, we watch helplessly as adult film performers capture money shots, dance around anatomy for soft porn gigs, and coax reluctant amateurs to perform as the clock is ticking. Culled from 10 years of drenched, hellish footage, renowned visual artist (and first time filmmaker) Raphael Siboni shapes an intriguing portrait, one that never glorifies or condemns its subject or his chosen profession.
